

County Durham and Darlington COVID-19 Testing

Swab Testing FAQs

Can my family get tested?

If the frontline worker has symptoms, we will only test them. But if it's a member or multiple members of your household, they will all get tested up to a maximum of four. **There are currently no testing facilities for under 18s in the North East.**

How will I get my results?

You will get your results by email or text. We are aiming to return results within 48 hours of taking the test.

What will the test tell me?

The test will confirm if an individual who is showing symptoms of the disease actually **has it**. It will not confirm if you have had it and have now recovered.
